Travelling to

Carnarvon?

Please don't
bring **fruit**

Fruit fly is a major horticultural pest that we are trying to **eradicate** from **Carnarvon**.

You are welcome, but
please don't bring your fruit !

**Horticulture
Innovation
Australia**

**CARNARVON
GROWERS
ASSOCIATION INC.**

Carnarvon is a very important horticultural area for Western Australia and visitors play an important role in the management and eradication of fruit fly.

You can help!

Fruit flies lay eggs in fruit. Often fruit that looks perfect on the outside can contain eggs or larvae on the inside.

Fruit fly can't fly vast distances but it can hitchhike into remote areas in fruit carried by travellers.

Please dispose of your fruit before you arrive in Carnarvon.
