

Welcome

TO THE ALICE SPRINGS BIRDING TRAIL

Alice Springs and its surrounding area is a fantastic birding destination. The desert landscape of Central Australia is home to 180 bird species in a range of spectacular habitats from sandstone rock formations, arid woodlands, sandy flats, waterholes and spinifex grasslands.

IMPORTANT INFORMATION

The wellbeing of our birds is our top priority. Making as little impact as possible in these environments is of high importance for the future protection of these wonderful species.

- Keep to the marked tracks and obey all signage.
- Do not disturb or feed any of the wildlife. Limit the use of recordings or 'call-back' and keep well back from nests and nesting colonies, roosts and important feeding sites.
- Please note that some locations on this trail do not have mobile signal. Ensure you are well equipped for the sometimes harsh desert conditions.

Ensure you drink plenty of water and have appropriate clothing, footwear and hat to protect you from the elements. Sunscreen and insect repellent are recommended.
