# Welcome to the HEART, SOUL & CENTRE OF AUSTRALIA

**The Red Centre never ceases to inspire or amaze, whether you're a resident or here for the first time. From the moment you arrive in this vast and unique landscape, an abundance of exciting fun-filled adventures awaits.**

The Red Centre has a rich connection with art, culture, land and Australian pioneering history. Many who live in Central Australia have a strong link to the land: it is their home, their business, their history and their future. Art is an amazing opportunity to experience the diversity of the landscape, which we see every day. You can explore the region's ancient and beautiful landscape by foot or on wheels to discover the amazing waterholes, hiking tracks and all the attractions, events and experiences that we have on offer.

Our strong connection to land and to people is present in our rich art history and culture. The country throughout Central Australia has close ties with the first Australians, who are the Traditional Owners of this land. Their ancient living history can still be seen today in the form of rock carvings at sacred sites, along with paintings, jewellery made with traditional beads, basket weaving and a plethora of other art practices.

We have consolidated the region's amazing art attractions and events into four easy-to-follow trails so that you can discover and experience the full richness of art in the Red Centre. Once you immerse yourself in the magic of Central Australia and connect with the land, people, culture and history - the experience will never leave you.

**Go exploring, your art adventure awaits you!**

Artists of Ampilatwatja was established in 1999. The work produced by the artists is recognisably distinct from other Aboriginal artistic communities, due to the application of fine dots and the often bright and child-like figurative depiction of the land. Most of the artists paint Arreth, which translates to 'strong bush medicine', demonstrating a deep connection to country. A veritable source of life, the land has provided and sustained Alyawarr people for generations.

# RED CENTRE ROCK ART

Emily Gap

**Experience all that Central Australia has to offer while travelling on an Art Trail adventure by adding Aboriginal rock art sites to your itinerary. Many of these sites have signage that explains the history, cultural and spiritual interpretations of these rock carvings. These are a few of the many popular rock art sites.**

**Yeperenye/Emily and Jessie Gaps** are the first rock art sites that you'll come across when traveling into the East MacDonnell Ranges. Here you will find fascinating Aboriginal rock art that are important spiritual sites to the Eastern Arrernte

Aboriginal people. Emily Gap is a registered sacred site and is home to a large rock painting that represents the caterpillar dreaming. The Park is open all year round and is located only 10km east of Alice Springs along the Ross Highway.

Approximately 90km east of Alice Springs, a little further along from Yeperenye/Emily and Jessie Gaps is **N'Dhala Gorge** (4WD only). This site contains more than 6000 ancient carvings as well as art sites and shelters. The oldest rock carvings here are believed to be 10,000 years old.

**Many rock art sites can be found in the West MacDonnell Ranges at Wallace Rockhole.** This is a small Arrernte Aboriginal

Ochre Pits

Wallace Rockhole

community located 117km west of Alice Springs along Larapinta Drive. Here you can take a guided or self-guided tour to view ancient Aboriginal rock art and carvings.

**Napwerte/Ewaninga Rock Carvings Conservation Reserve** is a six-hectare reserve located only 39km south of Alice Springs. Here you can follow the marked walking track (680 metres) to view the best rock art sites. The track provides visitors with a new understanding of an ancient culture. Time your visit for early morning or late afternoon during summer to avoid the heat. These are also the coolest times of the day for walking during the summer.

**The Ochre Pits** are a colourful outcrop of ochre on the banks of a sandy creek, located approximately 110km west of Alice Springs.

Ochre has always been an important part of Aboriginal culture. The ochre is used in ceremonies and played an important role in the continent's economy where it was used as a bartering commodity with neighbouring clans. This practice is still used today.

The pits consist of several layers of multi-coloured rock and offer visitors the unique opportunity to view an ochre deposit that is still used by the local Arrernte people. This is a registered sacred site and is protected by Sacred Site and Parks and Wildlife legislation. Please do not touch or interfere with any of the ochre; penalties apply.
