

## WESTMORLAND FALLS

A fairly easy two hour walk along a well-defined track, Westmorland Falls is suitable for the whole family. The walk gives visitors a taste of the tall eucalypt forest growing across the Tiers, along with its varied understory of ferns, including the iconic tree fern. The walk culminates at an attractive secluded waterfall.

	Time: 2 hour return Distance: 3.5 km return
	From either Mole Creek or Chudleigh, take Caveside Rd (C169) and turn into Wet Cave Road (6km from Mole Creek or 9km from Chudleigh). Turn left when you reach the Wet Caves. Continue until you reach a small car park with a "Mole Creek Karst Conservation Area" and "Westmorland Falls" sign. Ref: -41.615317, 146.404476 (type this grid reference or "Westmorland Falls" into Google Maps) Retail Map: 4439 Mole Creek
	There are no amenities at the walk location. However there are toilet, cafe and accommodation options at nearby Chudleigh, Mole Creek and surrounds.
	Grade 2: Suitable for most ages. The track has a hardened or compacted surface with gentle hill sections and occasional steps. There are a few rough and muddy sections to navigate closer to the falls.
	Supervise children, the track crosses a creek with potentially fast flowing water and the rocks at the falls can be slippery.

The walk heads generally south-west with a few short steep sections and sections of stone steps. About 300m from the car park, avoid a track off to the right leading onto private property.

From here the track passes beneath tall eucalypt and vibrant rainforest species, and the moss covered forest floor is often decorated with colourful fungi of various shapes and sizes.

About half way along the track you will reach a small plastic tub housing a log book for you to record your thoughts, and further on a tributary stream is crossed on a modern bridge. Beyond here it can be a bit muddy after rain, but the extra 150m to the falls viewing platform is well worth it! Steps allow easy access to the river bed, where if you look closely you will see fossilised shells in the rock formations.

Good shoes (and a change of footwear in the car) are advisable if the weather has been at all wet.

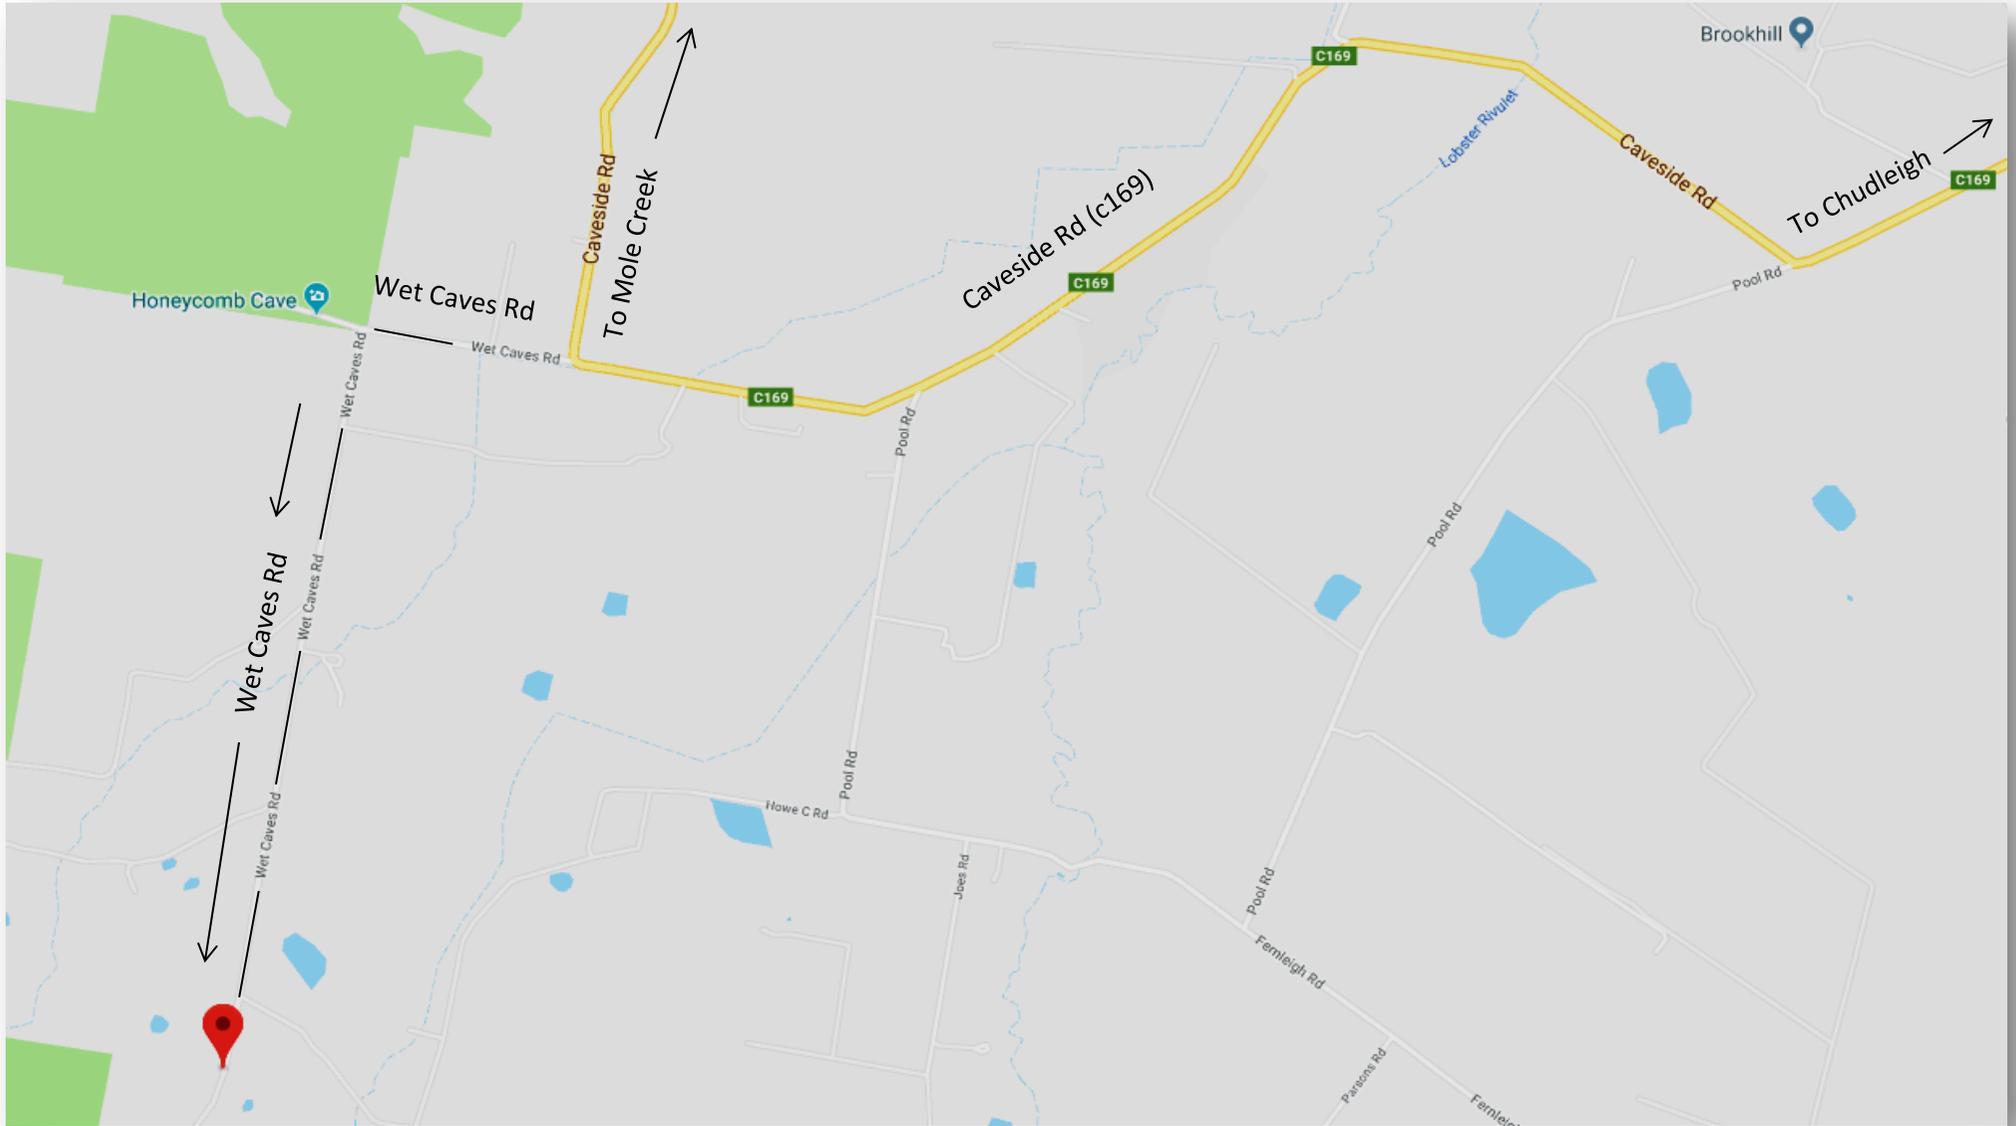

**SAFE WALKING:** Plan, be prepared, walk with friends, tell someone where you are going. Consider hiring an EPIRB from Service Tasmania to prepare for emergency events. Make a personal determination as to your fitness and ability to undertake specific walks.

**LEAVE NO TRACE:** walk on formed tracks, observe all restrictions, dispose of waste properly and leave what you find.
