

WHAT'S BITING JUNE

Winter is here, and dropping temperatures do little to slow the fishing along the McLaren Vale and Fleurieu Coast – quite the opposite in fact!

With conditions cooling down this has sparked the arrival of many popular Winter species to the area, and anglers are already reporting good catches of salmon, flathead, mullet and others.

So don't put your fishing gear in cold storage just yet, as the fun is set to continue!

FISH SPECIES	WHERE TO FISH?	HOT TIPS
Mulloway	Onkaparinga River	Fish continue to bite in the river on live and dead baits mostly
Mullet	Sellicks Beach, Moana, Southport, Onkaparinga River	Still a small window to score mullet. Try in nicer weather conditions and don't cast too far
Squid	Aldinga, Maslin Beach, Moana, Seaford, Port Noarlunga	As days become darker, the use of a UV torch is highly recommended to light your jags up
Bream	Onkaparinga River, Seaford, Witton Bluff, O'Sullivan Beach	Some good Winter bream are available around the southern structures. Fish as light as possible with bait and lures working
KG Whiting	Aldinga, Moana, O'Sullivan Beach, Port Stanvac	Whiting will move onto Winter grounds. They will fire up a day or two after a blow
Garfish	Moana, Seaford, Port Noarlunga Jetty, Christies Beach, O'Sullivan Beach	It's a great time for big red bill gar to be around. Try fluorocarbon trace line for better results
Tommies	Aldinga, Moana, Seaford, O'Sullivan Beach	Just after the sun goes down is a peak time for tommies to come on the chew
Flathead	Onkaparinga River	Good winter flatties are common along the sandy edges of the lower Onkaparinga River
Salmon	Sellicks Beach, Silver Sands, Port Willunga, Maslin Beach, Moana, Southport, Port Noarlunga, O'Sullivan Beach	Salmon season has started with fish to 2.7kg at this stage. Let's hope for a good season and big schools. Metal lures and whitebait/pilchard bait are popular
